Life takes shape
with Welser Profile

www.welser.com
Trendsetting in the business of forming.
The Welser family business has existed since 1664. What started out as a pan smith in Ybbsitz, Austria, is today a highly modern profile forming company with a technology centre, manufacturing in Austria, Germany and the United States as well as having sales centres and customers in different areas of economy from around the globe.

- Manufacturers of special profiles and profile pipes made from steel, stainless steel and non-ferrous metals
- Until now, 11 generations of the family in the firm
- Over 22,500 profile sections produced
- Overall company footprint in excess of 139 acres
- More than 2,500 employees
- 4 Manufacturing centres
- Sales locations worldwide
Steel in good shape.

We produce special profiles by forming with roller presses. The steel strip runs into the profile machine where it is formed continuously with up to 60 different forming steps into a finished section – economically, flexibly, and eco-friendly.

Our special core competence.
We not only manufacture profiles, but also products and solutions that are tailored precisely to our customer needs – to the point of being fashioned with the highest quality in good time. This is only possible through joint product development, in-house toolmaking and downstream processing.
To make our mark.

Controlling Complexity.

We deliver our profiles, made with such a depth of specification, that they correlate exactly with what the customer demands. The different refining steps of putting together a better product are if possible, pulled into one process. That is how we continuously ensure cost effective production.

We offer suitable technology to meet every demand.
We offer the fitting technology to meet every demand. Our profiles are 'so unique' because each one is made to measure exactly to your requirements. We can make sections and profile shapes of higher steel qualities as well as non-ferrous metals, unthinkable even a few years ago. Profiles from Welser stand out as being the most complex sections, highest quality surfaces, and meeting the most demanding solutions, all in one package. Thanks to further development, working processes such as optimising strip thickness or split bending, our solutions can also vary in thickness, breadth, depth and height.

**OUR COMPETENCE**
- Punching: pre- and post-punching, or punching during the roll forming process
- Cutting/Hole Punching Techniques: conventional cutting/sawing, or laser cutting
- Joining: HF- or laser welding, riveting, pressure joining, glueing etc.
- Bending: stretch bending, roll bending, mandrel bending, or bending in the profile machine
- Finishing processes
- Milling
- Drilling
- Embossing etc.
It is our aim to deliver to you the optimal tailor-made solution for your area of application. That is why we would like to be involved in your project planning and so accompany you from concept to production run. Together we can recognise improvement potential early on and we can produce economically for you. We have already developed, together with our customers, over 22,500 sections. And every day there are more.
• Small changes in shape and section have ...
• a great knock-on effect in direction of economy and bring ...
• a greater benefit when working with our experts early.
Well on the way with Welser Profile.

Our customers are placed in diverse markets. Their demands often change and from one moment to another – the world is always turning. It is important to react quickly and flexibly for this reason and to always develop further technologically.
There are practically no boundaries when it comes to our special profiled products. From the automobile to the cruise liner. From the Underground to the Snowcat. Secure, strong yet lightweight – Welser Profile are always in their element.
Room to grow.
Welser Profile gives your ideas freedom to grow. From the playground to the skyscraper. From the elevator to photovoltaic power. With Welser Profile to build on:

-Structural calculations to the limits of load bearing
-Choice of pre-material: Our processes are suitable for all metals
-Short delivery times are down to intelligent modular tool concept and optimized supply chain management
With Welser Profile your work bears fruit.

From tractor to trailer, from the high bed to the wine vat. Welser Profile can supply to your growing demands.

We offer a mature solution with reference to

- Longevity
- Great functionality
- High quality surface, exactness and reproducibility with sections and bent parts.
With Standards in mind.

To be exact – and not only with tolerances.
Lean on us:

Profiles are our passion. The highest quality is our mantra. The trust that our customers put into Welser Profiles is backed up by our numerous awards.

Additionally to our preventive measures testing we continuously carry out controls - from the pre-material via the manufacture and on to the finished product. We like to have this certified through the following:

- Quality Management System
  - Matrix Certificate as in EN ISO 9001: 2015
- Health and Safety Management System as in OHSAS 18001: 2007
- Environmental Management System as in ISO 14001: 2015
- Energy Management System as in ISO 50001: 2011
- Quality Management System as in IATF 16949:2016
Responsibility is an honour.

VALUE ADDED CHAIN:
- Product development together with client
- Visualization from FEA supported illustrations
- Rapid prototyping - creating samples
- Delivery guarantee through production centres in Austria, Germany and the USA
- Continuous delivery information flow throughout the whole product chain
- Optimized cost and fit for purpose packaging

In good hands with Welser Profile.
Our customers can rely on Welser Profile from beginning to end. From consultancy to delivery.

We surely keep your secret: We guarantee every market participant that they have the rights to their own knowhow. We are happy to document your exclusivity – even after the event. At the same time you can profit from the experience we have gained from other areas and non-protected products.
Something else that is close to our heart.

The responsibility for humans and the environment counts a lot for us. We therefore give special attention to the training of our employees and their good working conditions that are topical in this day and age, because only well educated and motivated employees are prepared to put ideas into action.
More than 2,500 employees across the sales offices and the 4 production plants in Ybbsitz, Gresten [Austria], Bönen [Germany] and Valley City [USA] are continually working to successfully bring the requirements of our international customers to fruition.
