

Packaging guidelines

Standard Bundle Packaging

- Advantages:
 - Cost-effective
 - Minimum effort
- Disadvantages:
 - No protection against external factors
 - No protection against corrosion
 - Disposal of wood used for bundle packaging

Pallets with cover frames

- Advantages:
 - Optimum protection of package
 - Can be used in circulation again
- Disadvantages:
 - Very costly packaging
 - Only suitable for packages <1.150mm
 - Agreement on circulation required

Wooden box packaging

- Advantages:
 - Optimum protection of package
 - Can be used in circulation again
- Disadvantages:
 - Very costly packaging
 - Somewhat difficult to handle during production
 - Circulation or disposal agreement

Pallet packaging with wooden end caps

- Advantages:
 - Package can be handled easily
 - Can be used in circulation again
- Disadvantages:
 - Costly packaging
 - Takes some time to fit the end caps
 - Disposal of end faces/wood used for bundle packaging

Packaging guidelines

Steel box packaging for filter plates

- Advantages:
 - Can be handled easily
 - Optimum protection of package
 - Solid outer packaging
- Disadvantages:
 - Very costly packaging
 - Individual production required
 - No load-bearing packaging
 - Disposal of metal packaging

VCI film packaging (corrosion protection packaging)

- Advantages:
 - Optimum protection against corrosion
- Disadvantages:
 - Costly packaging
 - Difficult to produce
 - Package must be kept cold and dry before it is packaged

Special pallet packaging

- Advantages:
 - Ideal for bulky packages
- Disadvantages:
 - Difficult to handle
 - Difficult to produce/store/transport
 - Disposal of wood used for pallets

Cardboard packaging

- Advantages:
 - Ideal size for pallet picking
 - Only suitable for lengths up to a max. of 3,000mm
- Disadvantages:
 - Less stability
 - Must not be exposed to moisture
 - Disposal of cardboard
