Storage Technology

Metal Sections for Automated Material Handling Systems

We offer a wide range of solutions for logistical services: For automated mini-load systems, pallet warehouses, shuttle or stacker crane systems and clad-rack warehouses.

Trusses

Uprights

Frame bracings

Cross beams

Backstop beams

Large-scale Omega-uprights

Tray supports

Channel rails

Shuttle rails

Guide rails

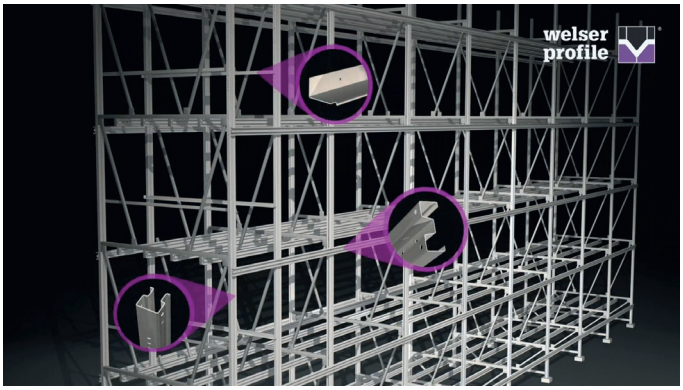
Storage Technology

WEIGHT-OPTIMIZED
ECONOMICAL
LOAD-BEARING
FUNCTIONAL
PRECISE
HIGH-STRENGTH

Our Portfolio:

- Strip thicknesses from 0.3 to 8.2 mm
- Strip widths up to 800 mm
- Profile lengths up to 14,000 mm
- Profile heights up to 320 mm
- High-strength steels



Your Advantage:

- Customized, roll formed metal sections in tight tolerances that can be produced in a consistently high quality
- Large-scale Omega-uprights in high-strength steel, galvanized steel up to a thickness of 6 mm
- Individual service package regarding to project management, delivery concepts, high diversity of profiles, material selection or labelling
- Weight savings thanks to the selection of the appropriate primary material and design of the profile (load-adapted,...)
- Economical production and efficient use of materials as a result of sophisticated factory and equipment
- More Info on www.welser.com.

- Manufacturer of high-quality special profiles and complex assemblies through the roll forming of steel and non-ferrous metals
- Family organization currently in its 11th generation
- More than 25,000 different profiles produced to date
- Total manufacturing area 784,000 m² (194 acres)
- Approx. 2,400 employees
- 5 production sites in AT, DE and US
- Sales offices worldwide
